

	Light (Cheapest)	Pro (Optimum)	Enterprise (Skilled)
Main Property of the package	This package is for small companies which want to use Safe Jets QMS as a recording, archiving, and printing tool. Only one user is authorized to save and organize data who will be able to use all useful tools to effectively manage CM and SM systems.	This package is for mid-size companies which want to use Safe Jets QMS for interactive management of compliance monitoring and safety management as well as an effective recording and archiving tool. You can add your other postholders, managers, auditors and safety key personnel to the system and all users can interactively use Safe Jets QMS.	Enterprise package is not only the unlimited version of the PRO package but also system admin is able to set access privileges. We also make customizations to the system according to company's current systems. Report and dashboard templates are available on request.
